

Revised 3/2008

*SAAMI specs call for a maximum COAL of 3.175". The Barnes 300-grain TSX bullet was deliberately produced with a semi-spitzer style ogive and a cannellure positioned to load the cartridge to a COAL of 3.210". This exceeds SAAMI specs in order to maximize case capacity and take advantage of the improved ballistic performance the bullet's semi-spitzer ogive offers.

*Recommend crimping case mouth into the front cannellure groove.

◆ Indicates most accurate load

.405 Winchester

Bullet Weight: 300 gr	Case Trim Length: 2.573"	S.D.	0.254
Bullet Style: TSX FB	Primer: Fed GM210M	B.C.	0.280
COAL: 3.210"	Barrel Length: 24"		
Case: Hornady	Twist Rate: 1:14"
