A Safety Data Sheet (SDS) has not been prepared for these product(s) because they are articles. Articles are not subject to the Occupational Safety and Health Administration's Hazard Communication Standard (29 CFR 1910.1200(b)(6)(v)). As defined in this standard: "Article" means a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical, and does not pose a physical hazard or health risk to employees.

The product(s) listed above fall under the definition of an "article" as presented in the referenced OSHA regulations and contain no hazardous chemicals as defined in that regulation. As such, there is no requirement for the preparation or provision of a Safety Data Sheet for this/these product(s) and Barnes does not offer such documentation.
